SUMMER CROPS FORECASTED

OKLAHOMA: The first production forecast of the year for the State's summer-growing crops shows a decrease from last year's production according to the USDA-NASS Oklahoma Field Office.

Wheat production is estimated at 128.7 million bushels, unchanged from last month but down 22 percent from last year's production. An average yield of 33 bushels is expected from 3.9 million harvested acres.

Production of corn for grain is forecast at 27.3 million bushels, down 9 percent from last year. An average yield of 130 bushels is expected from 210,000 harvested acres.

Cotton production is forecast at 290,000 bales, down 4 percent from last year. A yield of 633 pounds is expected from 220,000 harvested acres.

Production of grain sorghum is forecast at 11.04 million bushels, down 23 percent from 2004. An average yield of 48 bushels is expected from 230,000 harvested acres.

Peanut production is forecast at 80.6 million pounds, down 21 percent from last year and the lowest production since 1956. A record tying average yield of 3,100 pounds is expected from 26,000 harvested acres. Harvested acreage is the lowest since 1937.

Soybean production is forecast at 6.8 million bushels, down 22 percent from 2004. An average yield of 25 bushels is expected from 270,000 harvested acres.

Production of all hay is forecast at 4.8 million tons, down 20 percent from last year. Alfalfa production, at 1,056,000 tons, is down 27 percent from 2004. Production of all other hay is forecast at 3.78 million tons, down 18 percent from last year.

Peach production is forecast at 4,000 tons, doubling last year's 2,000 tons.

UNITED STATES: Production of all wheat is placed at 2.17 billion bushels, down 2 percent from the July forecast but up slightly from 2004. Yield is forecast at 43.0 bushels per acre, down 0.8 bushels from last month.

Corn production is forecast at 10.3 billion bushels, down 12 percent from last year but 3 percent above 2003. Yields are expected to average 139.2 bushels per acre, down 21.2 bushels from the record high last year.

All cotton production is forecast at 21.3 million bales, down 8 percent from last year's record high. Yield is expected to average 748 pounds per harvested acre, down 107 pounds from 2004.

Production of grain sorghum is forecast at 380 million bushels, down 16 percent from 2004. Yield is expected to average 63.1 bushels per acre from 6.03 million harvested acres.

Peanut production is forecast at a record high 5.14 billion pounds, up 21 percent from last year's crop. Yields are expected to average a record high 3,190 pounds per acre from 1.61 million harvested acres.

Soybean production is forecast at 2.79 billion bushels, down 11 percent from 2004. Yields are expected to average 38.7 bushels per acre from 72.2 million harvested acres.

Production of all hay is forecast at 149.9 million tons, down 5 percent from 2004. Alfalfa production is forecast at 73.8 million tons, down 2 percent from last year. Yields are expected to average 3.34 tons per acre from 22.1 million harvested acres. Production of other hay is forecast at 76.1 million tons, down 8 percent from 2004. Yields are expected to average 1.92 tons per acre from 39.6 million harvested acres.

1/ Oat yield and production for Oklahoma for 2005 will be available on September 30, 2005.

2/ Area planted for all purposes.

3/ Cotton yield in pounds and production in 480-Lb. bales.

4/ Estimates carried forward from an earlier forecast.
